

EFFICIENCY SMART POOL PUMP REBATES

Get up to **\$500**
back when you
install a qualifying
pool pump.

An ENERGY STAR® certified variable speed pool pump can save you up to \$2,800 over its lifetime compared to a less efficient new model. They also run quieter and can help prolong the life of your pool's filtering system.

Save even more with \$500 back on a qualifying in-ground model or \$250 back on a qualifying above-ground model.

When to Replace Your Pool Pump

- It is seven to ten years old
- It has reduced power
- It continuously makes noise
- It gets hot while operating and shuts off
- It hums or buzzes without starting
- It starts slowly
